THE ONLY FINE ARTS FM STEREO IN CENTRAL NEW YORK

WONO

Broadcasting with 10,600 watts for 18 hours a day - full time FM STEREO

WONO blankets THE CENTRAL NEW YORK AREA...

publishers' notes...

WTFDA HEADQUARTERS, P.O. BOX 163, DEERFIELD, IL 60015 USA

ANARC CONVENTION ANNOUNCED... The Association of North American Radio Clubs has announced a confirmed convention site and date. The convention is to be held in San Diego, California on the weekend of July 27-30. The convention is to be hosted by Fr. Jack Pejza (of the IRCA) at the "Fabulous Inns of America", near the intersection of I-5 and I-8. Registration fee is \$5. Room rates vary with number in party. We have no address to write for reservations of further info, but a letter to ANARC HQ will certainly be forwarded. ANARC, PO Box 3012, Jackson, TN 38301.

"MAN OF THE YEAR AWARD" NOMINATIONS NOW BEING ACCEPTED... From now until June 20th, nominations are being accepted for the 1973 ANARC Man of the Year Award. This award is given annually to someone in the DX hobby who has made significant contributions (either in the past year or for a number of years) to the hobby. Those wishing to nominate someone for this award should write to the chairman (Dan Ferguson, 1521 Smith Road, Apt. 7, Charleston, WV 25314) detailing the reasons for believing the award should go to the person being nominated. It should be noted that only data contained in the nomination, or data already available to the members of the committee, will be used in making the decision. Therefore, full data should be given in the nomination letter. In addition, nominations are also being accepted for the ANARC merit awards. Winners will be announced at the ANARC convention.

WTFDA CONVENTION NEARS... The first weekend in August is a lot closer than you might think! Convention host Bob Seybold is hoping that most members planning to attend will make early reservations. It's easy to do-- just fill out the reservation form, or drop a letter to Bob. Full convention details are on page 31 of this issue. **SEND YOUR RESERVATION TO BOB TODAY!!**

DESTRUCTION IN NEW ORLEANS... The custom built tower of Ron Le Blanc (featured on our September 1972 cover) has met with disaster. Ron informs us that a guy wire snapped, causing the tower to whip back and break up. The tower and antenna system, all 70' worth, was a total loss... And as if that wasn't bad enough, when the tower fell, it hit a fiberglass boat in his neighbor's back yard. You think you've got troubles?

Es SEASON WELL UNDER WAY... The 1973 Es season seems to be off to a good start. Although the results are not visible in this month's reports-- or lack of them, we'll see plenty of new loggings in next month's VUD. This again brings me to the subject of preparing column reports... Your editors will be receiving a large number of reports in the coming months. To make it easier for them to prepare their columns, please keep your report neat. Type or print, if possible, on a report form, or in the form used by your editor. List your loggings in the order received, and try to eliminate the very common tropo loggings noted. Send your un-identified loggings directly to the CCI editor. Your editors will appreciate your help.

NOTES OF NOTE... A new company, Spectrum Enterprises, is now offering VHF Radio directories for sale. The first in their series covers Chicago area police, fire and local government. 8 pages for \$1.25, from PO Box 253, Deerfield, Illinois 60015... WTFDA is no longer accepting orders for club rubber stamps. We have had problems with our supplier, which have not yet been corrected... 1/2" videotape is available at very low prices, in bulk, from: General Supply, Box 14628, Houston, Texas 77021. Information is free.
73. Gary and Morrie

MEXICO

THE LATEST DEVELOPMENTS

JUNE IN TELEVISION AND FM
1973

...by Glenn Hauser

ANOTHER WEEK IN MEXICO gained us a lot more information about TV and FM, especially in the states of Coahuila, Nuevo Leon and Tamaulipas--plus a crumpled fender!

TELEVISION CULTURAL DE MEXICO repeaters may spring up anywhere there is a microwave relay station and sufficient locally-raised funds to pay for the transmitter. The three we saw, in Piedras Negras, Allende and Sabinas, Coahuila were all 100-watt translator-type transmitters, fed to yagis mounted atop the microwave towers. It seems quite likely the unidentified ch 6 (actually about 88.1 MHz audio) we heard from the west in Von Ormy was the TCM repeater in Piedras Negras, which has been on ch 6 since its inception last August--despite various listings on 12 and others! It went out of order a couple days before we arrived 8 May, but they hoped to have it back on in short order. DXers should note that programming on TCM repeaters can originate from any of the Mexico City channels, with some TCM-only programming and TCM IDs (none local, of course). TCM isn't strictly cultural--it carries such things as sports, variety shows, and Lassie. The TCM schedule (as of March): Weekdays 1400-2430; Sat. 1020-1400 & 1600-2330; Sun. 1130-1400 & 1600-2320 (CST). TCM-originated shows one week were scheduled Tues. & Fri. 2200-2300; Wed. & Fri. 2030-2100; Sat. 2100-2200; Sun 2000-2030. Various sources give us these TCM repeaters in addition to the ones in our April article and on the next page; we are not adding them to our master list until certain of the channel and a power of 100 watts or more:

- | | | | |
|---------------------|----------------------|-----------------------|----------------------|
| 3 Benjamin Hill Son | 5 Pitiquito Son | 7 Villahermosa Tab | 12 Durango Dgo |
| 4 Cd. Carmen Camp | 7 *Isla de Cedros BC | (some say ch 9) | 13 San Cristóbal las |
| Cd. Delicias Chih | San Juan de los | 8 *Guerrero Negro BC | Casas Chis |
| Cd. Maderias Chih | Lagos Jal | 9 Guaymas Son | *--video-cassette |
| 5 Altar Son | Salina Cruz Oax | 10 Comitán Chis (137) | (non-interconnected) |

Piedras Negras Coah viewers must depend on Eagle Pass TX CATV not only for US nets but for Mexican TV (aside from the sporadic TCM repeater). Their end-of-the-line microwave station has capability for only one TV channel--TCM. So the CATV system thru its Mexican-side counterpart plays skewy tapes of some Mexican shows and carries KXEH-41, which airs other Mexican tapes of slightly higher quality. No one knew of a ch 12 CP in that city.

XHBW-9 Monclova has a 2-bay antenna on a short stick, dwarfed by an immense, much higher microwave tower a block away; one wonders why the XHBW antenna isn't moved atop the microwave tower. No local IDs pass on XHBW-9 and there is no TCM repeater in Monclova.

Monclova does have a CATV system, however, as do Monterrey and Reynosa, where we learned there has never been an XHBV-9 or any other local repeater on the air, nor is one likely with the advent of CATV.

XEFB-3's unique ch 83 translator in Zapata TX has never been seen in Von Ormy; visiting the town we learned it had been off more than 10 years--despite much more recent listings in TV Factbook. Likewise, CATV has driven off the Carriso Springs TX translators.

MONTERREY NL is due for a fifth "Canal Cultural" come September. Under auspices of the Instituto Tecnológico, ch 8 is under construction near the university in the SE part of the city. No power is known, but it should be low, as it is short-spaced to KGNS-8 Laredo. In last year's enigmatic Official Stations list, XHFN was the call given for Monterrey-8. Monterrey is cupped by high mountains from the north westward to the SE, but DX paths to the NE are unobstructed.

gets out best, and now we transmits from the high SE of the city. That inaccessible site is lit up at night, easily visible from the average terrain far below. Crows ascend for weekly or two-weekly shifts, reaching the top on muleback. XEFB-3 and XHX-10 transmit from the much lower Cerro El Mirador south of the city, tho the old self-supporting tower remains at the downtown studios. XHAW-12 transmits from the same 29-floor downtown building as XHSRO-92.5 (no relation), but plans a move to Loma Larga, not far from El Mirador, where room has been reserved for it and two more FMs in the XHRL-98.1 transmitter building. This Loma is only about 250m above the city, lower than both the other sites; a nearby airport prevents towers very far above the ground. At XEFB-3 we had a very informative visit with CE Ing. Alfonso R. Tames, who showed us his 1972 DX report file, from such people as Gold-

man, Hostetler, Kirkpatrick and several potential new WFFA members: XET-6 studios were a depressing shell--not only because local production has been eliminated, but because a lightning strike had burnt out most of the house lights. We did learn that some filmed programming is still shown locally (see the updater on next page).

MONTERREY

We've long noticed that XET-6 know the reason. It alone

Cerro de la Silla mountain

stereorey

XHSRO-FM 92.5 mc.

XET-94.1 now uses the self-supporting former XET-6 tower at the former studios. "Stereo 94" operates from a penthouse atop the vacant building, accessible only by spiral staircase or ladder. Most broadcasting in Monterrey is organized into extensive "grupos". Estrellas de Oro, for instance, comprises 6 AM stations and 2 FM CPs in one studio complex, XHAW-12 in another place (XGAW-1280 being the group's key station), and the separately-owned subgroup of XHRL-98.1 and two sister AM stations including XEG-1050 (yes, the one with all the preachers!) whose studio it adjoins. Chica's manager agreed with me that fuller IDs would be a good idea!

Grupo Radio Alegria studios house the XHRK-96.5 and XENV-90.0 transmitters; neither is legally allowed to serve as an AM link any longer. Still, they continue simulcasting XEBJB-570 and XENV-1340. XHRK-96.5 carried experimentally for a short while XEFV-1110 programs to extend daytime "R. Kono-La Mascota Musical" into the evening. XHXL-90.1 still hasn't been born the it appears in GRA publicity. Talk was that these two FMs plus the next two would organize into a "Grupo FM".

XHSP-99.7 is the newest FM, having come on in April, with IDs only as "Stereo Ritmo"; it never mentions Monterrey and has no proper sign on/off announcements. To top this, XHSP is operating on approximately 100.2, putting it uncomfortably close to XHMG, which in turn seems to have slid closer to its nominal 100.5. We left a message for XHSP's manager, urging full identification and frequency correction. Both 100 MHz stations have 4-gain antennas on their low downtown buildings. We tried to visit XHMG-100.5 three times on two days, but despite its 24-hour schedule, no one ever came to the opaque wooden door with crudely-painted call letters--the city's only AM, FM or TV we didn't succeed in entering! KBFM-104.1 Edinburg TX almost amounts to another Monterrey local, since it's audible on the car or portable radio just about anywhere in the city--even inside Huasteco Canyon.

Monterrey's 148-174 MHz band is chock-full of FM links for various AM and FM stations; we heard them all; some are about to move above ch 13 to relieve the congestion: XENV-1340 has often had its programming relayed on competitor XETKR-1480 after the latter's adjacent frequency link signs off! Some of these should provide fine DX targets during intense Es or tropo openings from Monterrey. We have given the approximate directionality for some, deduced from known studio and main transmitter locations; powers are low, generally 10-50 watts (5w for 940 MHz, 13w for 217.3.) First a Sabinas Coah link plugged as an FM outlet:

173.24	XEBX-610	(Sabinas Coah)	05-23	W	(60 watts)
149.24	XENR-1140	"La Nueva MR"	24h	NE	(to move to 217.425)
149.3	XEAU-1080	"Radio AU"	days		
152.9	XEH-1420	"Radio Actualidades"	06-23	NE	(same as XHQQ-93.2)
153.14	XEBJB-570	"El Cañonero del Cuadrante"	05-24		(same as XHRK-96.5; move 217+)
165.08	XERC-690	"Onda Groovy"	06-01	NW	(to move to 217.725)
165.5	XETZ-1240	"Radio Felicidad"	06-24		
165.68	XET-990	"La T de Monterrey"	24h	NE	
173.48	XEG-1050	"Radio Melodía"	24h		(English at night)
173.6	XETKR-1480	"TKR"	06-24		(to move to 216.225)
173.66	XENV-1340	"Radio Alegria"	24h	E	(to move to 217.275)
217.1	XENL-860	"Radio Recuerdo"	06-24	N	
217.3	XHRL-98.1	"La Chica Musical"	07-02	SSE	(at times 24h; stereo)
217.7	XHQQ-93.2	"Radio Actualidades"	06-23	SSE	(same 152.9, XEH-1420)
940.0	XEFB-630	"XEFB"	06-24	E	

UPDATER to last month's FM & TV lists:

90.0	XENV-	power 0.075; relay, not link; hrd May 73	100.5	XHMG	hrd near nominal freq, May 73
93.2	XHQQ	relay, not link; add dp to format; sked 06-23	102.5	XHEC	sked 09-22, Sundays 10-14
94.1	XET-	add cl to format	3	----	add Sabinas Coah, 0.1 kw, net-TCM
95.44	XHOX	freq varies; here Apr 73	5	XHOC	indicate net as TCM, not 11
95.7	XHPJ	add CP, 6. kw, Monterrey; format io is	6	----	add Piedras Negras Coah 0.1 kw TCM
96.5	XHTA	format as au; no annts! 24h	6	XET-	change net to L+8; W. 1330-1530
96.5	XHRK	relay, not link; CP for 1. kw	8	XHTM	sked Sun 1030-1330, Mon 0030-0200
97.3	XHRE	"R Ensueño", sked 0830-20 (but carrier remained on past 2300)	8	XHFN ?	add CP Monterrey NL; net-L cultural
98.1	XHRL	add sked: 24h Sat Sun (also-hrd all night on a Wed)	10	XHX	sked +1045-1145 for net-2
98.9	XHJD	add CP, 6. kw, Monterrey NL; tentative "Estereo Recuerdo"	11	XEDI	Ciudad Juarez Chih 5. kw authorization; status uncertain
99.3	XHMS	sked 08-22 (soon to -24)	11	XETT	Chihuahua Chih 0.2 kw authorization offset -; status uncertain
99.7	CP	is on, but on 100.2 (qv)	11	XHBR	seen May 73 w/full net-2 schedule, no switchover to XEFB-2
100.2	XHSP	add Monterrey NL, 4. kw, "Stereo Ritmo" \$ 07-23 hrd May 73 nom 99.7	12	----	add Allende Coah, 0.01 kw, CP for 0.1 kw, net-TCM
			12	XHAK	change net to TCM
			14	XHEM	CP is on (per antenna ad on XHEC-3, May 73)

TEST YOUR E-SKIP KNOWLEDGE WITH A TRUE/FALSE QUIZ

- 1.) You need a rotatable, high, multielement fringe area antenna to log most E-skip.
- 2.) E-skip starts at the lower channels first, then moves up to the higher channels.
- 3.) If you log a channel 5 or 6 skipper, there is a good chance you will identify a channel 2 station transmitting in or near the same town.
- 4.) Diagonal bars and unusual offset during E-skip openings are always due to the fast fading signals.

1.) FALSE. The directional qualities of a good, rotatable deep-fringe antenna system are obviously desirable to null out locals on the same channels. However, since E-skip signals are usually strong, many E-skipers can be logged on modest gain antennas at low heights, even rabbit ears, if local interference is minimal. In fact, unless good trapping systems are used, excessive antenna height in areas close to many strong locals can cause severe adjacent channel interference that inhibits E-skip reception.

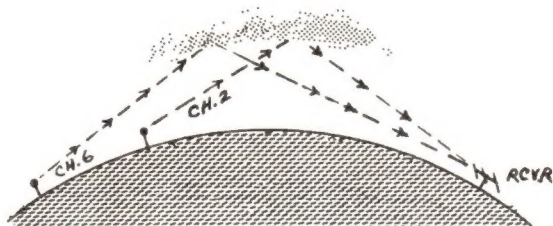

Surprisingly, rabbit ears are often preferred to an antenna system that cannot be rotated (assuming your skip stations don't come from one direction only), since the ears can be repositioned for best picture. Besides pivoting and arranging the ears so that they are 180° apart, try changing the polarization by holding the antenna perpendicular to the ground (pointing up and down) or diagonally for the best picture.

2.) TRUE. Skip will almost always start at the lowest open (ie, not strong local) channel and work its way up. However, if a DXer is so located that no lower channels (2, 3, for example) exist in a given direction, skip may begin at channel 4, for example. Obviously, when the receiving and transmitting points are within the USA with its multitude of stations, skip signs virtually always start at the lower channels.

3.) FALSE. For two reasons, this statement is generally untrue. First, as skip becomes more intense and increases to higher channels, the optimum distances over which the lower E-skip channels return to earth decrease. For example, during an intense opening, channels 5 and 6 might be received at 1000 to 1200 miles, but channels 2 and 3 may be received in the same direction at 500 to 800 miles. Pat Dyer has often published data relating skip cloud heights and distances over which radio waves may be received at various frequencies.

Second, as skip intensity increases and the higher channels become visible, the lower channels often become jumbled with several DX stations, sometimes making identification difficult.

4.) FALSE. Although rapidly-fading E-skip signals can cause unstable horizontal and vertical sync in poor receivers, diagonal bars and/or offset bars not of the usual 0, 10, or 20 kilohertz variety are not due to poor sync. Most likely, the received station is running "off-frequency". This is especially common among Mexican stations as noted by several southern USA DXers.

Also, the horizontal and vertical standards of some countries differ. This may make any attempt to stabilize the picture impossible because receivers used may have limited horizontal and vertical range.

*Update required by 10 Aug to remain listed. We regret dropping 12 DXers, including 3 over the 350 mark--do you feel a minimum of two reports a year is too much? Trl-UHF translators (included in "UHF") + after USA=DC; For=other countries; Sat=saturation; YB=year began. 73!

FCC TV NEWS - DATA

Don Ruland, editor
4448 68th Place
Kenosha, WI 53140

JUNE 1973

Before getting into this month's data, I would like to extend a warm welcome to all new members and readers. The Worldwide TV and FM DX Association is the only organization catering solely to VHF-UHF DX hobbyists, and the "VHF-UHF Digest" is the official publication of our club. This column as well as all others in the Digest need YOUR support to make larger, interesting, and informative reading material for our membership. Now for this business at hand.....

NEW STATIONS ON THE AIR/ GOING ON THE AIR

Elko, NV--(ch 10) KKKO granted authority 4-13-73 for programming start 4-18-73.
Montclair, NJ--(ch 50 ETV) WNJM granted authorization 5-9-73 for programming start 6-2-73.
Las Cruces, NM--(ch 22 ETV) KRWG-TV granted authorization 5-4-73 for unannounced programming start.

APPLICATIONS FOR NEW TV STATIONS

St. Cloud, MN--(ch 25 ETV) previous application amended to 165-kw vis., 33-kw aur., 553' above average terrain (AAT).
Pittsburgh, PA--(ch 22) new, 1503-kw max. vis., 158.5-kw max. aur, 966' AAT.
Lead, SD--(ch 5) new, 100-kw vis., 10-kw aur., 1900' AAT. Applicant requests facilities of KDSJ-TV ch. 5 Lead, and proposes to operate as satellite of ch. 7 Rapid City (see below).
Rapid City, SD--(ch 7) new, 196-kw vis., 19.6-kw aur., 744' AAT. Applicant requests facilities of KRSD-TV ch. 7 Rapid City.
Wausau, WI--(ch 20 ETV) new, 1202-kw vis., 240-kw aur., 987' AAT.

APPLICATIONS DISMISSED

Athens, GA--(ch 34 ETV) new.
Atlanta, GA--(ch 57 ETV) new.
Burlington, IA--(ch 26) new.

CONSTRUCTION PERMITS GRANTED

Los Angeles, CA--(ch 68 ETV) KVST-TV granted modification 4-25-73 for change to 2040-kw max. & 457-kw hor. vis., 91.2-kw aur., 2900' AAT.
South Bend, IN--(ch 46) new, granted 4-12-73 for 1027-kw max. & 912-kw hor. vis., 205.4-kw max. & 182-kw hor. aur., 1000' AAT.
Biddeford, ME--(ch 26 ETV) new, granted 4-19-73 for 699-kw max. & 589-kw hor. vis., 139.8-kw max. & 117-kw hor. aur., 800' AAT.
Portales, NM--(ch 3 ETV) KENW, granted modification 5-3-73 for change to 100-kw vis., 29.8-kw aur., 1150' AAT.
Grand Forks, ND--(ch 2 ETV) new, granted 5-3-73 for 100-kw vis., 20-kw aur., 1337' AAT.
Eagle Butte, SD--(ch 13 ETV) new, granted 4-25-73 for 316-kw vis., 31.6-kw aur., 1710' AAT.
LaCrosse, WI--(ch 31 ETV) new, granted 4-19-73 for 3800-kw hor. vis., 759-kw hor. aur., 830' AAT.
Wichita Falls, TX--(ch 24 ETV) new, granted 4-13-73 for 2.82-kw vis., 0.282-kw aur., 530' AAT.

CHANGES GRANTED IN TV STATIONS OPERATING

Hartford, CT--(ch 34 ETV) WRDH, granted change to 808-kw max. & 676-kw hor. vis., 82-kw max. & 69.2-kw hor. aur., 890' AAT.
Lexington-Richmond, KY--(ch 46 ETV) WLEB, granted change to 1050-kw hor. vis., 105-kw hor. aur.
Springfield, MA--(ch 57 ETV) WGBY-TV, granted change to 1200-kw max. & 776-kw hor. vis., 155-kw aur., 1000' AAT.
Schenectady-Albany-Troy, NY--(ch 17 ETV) WHNT granted authorization 4-26-73 for 2630-kw max. & 2000-kw hor. vis., 398-kw hor. aur., 980' AAT.
El Paso, TX--(ch 9) KTSN-TV granted authorization 5-1-73 for 316-kw vis., 42.7-kw aur.

CHANGES REQUESTED IN TV STATIONS OPERATING

Montgomery, AL--(ch 20) WCOV-TV requests change to 610-kw max. & 534-kw hor. vis., 122-kw max. & 107-kw hor. aur.
 Savannah, GA--(ch 11) WTOG-TV requests change to 1436' AAT.
 West Monroe, LA--(ch 39) KYAY-TV, prior request revised to include change from ch. 39 to ch. 14.
 Lancaster, PA--(ch 8) WGAL-TV requests change to 112-kw vis., 22.4-kw aur., 1356' AAT.
 Scranton, PA--(ch 44 ETV) WVIA-TV requests change to 1200-kw max. & 910-kw hor. vis., 120-kw max. & 91-kw hor. aur., 1674' AAT.
 Providence, RI--(ch 12) WPRI-TV requests change to 31.6-kw aur.
 Harrisonburg, VA--(ch 3) WSWA-TV requests change to .832-kw aur., 2123' AAT.

NEW CALL LETTERS ASSIGNED

New Haven, CT--(ch 65 ETV) WEDY.
 Baton Rouge, LA--(ch 27 ETV) WLPB-TV.

CHANGE IN CALL LETTERS

Miami, FL--(ch 17 ETV) WLRN-TV (formerly WSEC-TV).

REQUESTS FOR CALL LETTERS

South Bend, IN--(ch 46) new, requests WMSH-TV.
 Helena, MT--(ch 12) KELL-TV, requests KTCM.
 Lima-Bowling Green, OH--(ch 57 ETV) WQOL, requests WBGU-TV (station has been using WBGU-TV call since 3-24-73 airdate).
 Nashville, TN--(ch 8) WSIX-TV, requests WNGE.
 Celfax, WI--(ch 28 ETV) new, requests WHWC-TV.

TV STATE OF THE INDUSTRY

931 total stations on the air (604 VHF; 327 UHF).
 698 commercial stations on the air (511 VHF; 187 UHF).
 233 educational stations on the air (93 VHF; 140 UHF).
 83 approved stations not yet on the air (14 VHF; 69 UHF).
 62 applications pending for new stations (33 VHF; 29 UHF).

 Last month we erroneously listed the "mystery" ch. 13 station in Washington Court House, OH as being WOXP-TV. This should be WOSS-TV. Bill Matthews, of Columbus, OH sends along a schedule listing from the 5-15-73 Columbus Dispatch, listing this station's operating schedule from 1630 to 1900. Has anyone else seen this one?

The Department of Commerce in behalf of the National Bureau of Standards has requested a practical use of television blanking intervals (those black lines separating image frames when your TV picture is rolling vertically). They would be used to send useful information if a change in broadcast rules is approved by the FCC. National Bureau of Standards TV Time signals, capable of transmitting up to 600 words per minute, would be carried on a single line of the blanking interval, leaving normal TV pictures unaffected. An adaptor would be required to decode signals for presentation in caption form on the screen. Possible uses would include captions for deaf or foreign speaking viewers, as well as disaster or emergency alerts.

In addition to 931 U.S. TV stations presently on the air, did you know there are presently 2791 translator stations currently licensed? 1903 of them are VHF and 888 operate on the UHF band (mainly in the 70-83 range). So if you are sitting there with a measly 500 or so loggings and think you have just about seen all there is, just hang in there!!

Late word at press time indicates WVIR-TV (ch 29) Charlottesville, VA has been granted license to increase their power to 1290-kw max. & 427-kw hor. vis., 42.7-kw aur. They have recently become an NBC affiliate.
 -73's, Dan-

FCC FM NEWS

Bruce F. Elving, Editor
P. O. Box 24
Adolph, Minnesota 55701

News of FM stations and FM
station changes that you
know of is most welcome!

There's more FCC-FM and other FM-related news to relate than ever this month. Reports from VUD readers alone make for a pile of mail 2 1/2" high, including some of last month's backlog. Thanks to everybody who reported, but I regret not having time to answer these letter- and card-writers individually, due to moving from Milwaukee to the Duluth area, making ready the pages for the next edition of the FM ATLAS [which is expected to be published in June; all previous customers will be notified by mail], and spending time searching for that so-far-in-1973 elusive commodity known as FM DX.

New Construction Permits

Ozark AL 103.9 3000 189'
Santa Cruz CA *88.1 10
Estes Park CO K224AD 92.7 10 (KVOD 99.5
Denver translator)
Estes Park CO K237AF 95.3 10 (KLIR
100.3 Denver translator)

READERS' REPORTS AND COMMENTS In an attempt to clear up the backlog of reports, I will stick to this smaller, "squashed" type, go to two columns, and list everybody's contribution(s) alphabetically.

First, some general news dug up from a variety of sources.
 KYTO 99.9 Santa Barbara CA claims Stereo, as do WZRO 104.9
 Pekin and WYFE-FM 95.3 Winnebago [formerly WRV1]. WYFE-FM,
 serving Rockford, is on 24 hours. WVMR *90.18 Roanoke VA has a
 National Public Radio affiliation. WJCL-FM 96.5 Savannah GA
 has music from Stereo Radio Productions, as do WLYF 101.5
 Miami FL and WPCH 94.9 Decatur GA. WJCL-FM, in its promotion,
 says it programs only four commercial breaks per hour, and is
 "Savannah's only fulltime stereo sound and with 100,000 watts
 both horizontal and vertical . . . our coverage area exceeds
 by far any other broadcast signal in the Savannah market."

WMHT-FM *89.1 Schenectady NY recently added morning
 programming, now operating 7 days/week 7 am to 1 am. The U.S.
 Office of Education has awarded grants to make new public FM
 stations possible in: Sumter SC [not yet granted by the FCC],
 Rushford MN, Fairmont WV [see "construction permits" preceding
 page]. Facilities expansion grants have been awarded to:
 KVCR *91.9 San Bernardino CA to increase effective radiated
 power to 24500 (-320'); please note this as an addition to the
 "changes in facilities" column of the preceding page. Also,
 WVUB Vincennes IN, KTEP El Paso TX and KCUR Kansas City MO,
 all of which are listed in the same column. New changes on
 the way will affect KNCT-FM Killeen TX, KLCC *90.3 Eugene OR,
 KPFA 94.1 Berkeley CA and WKCS *91.1 Knoxville TN.

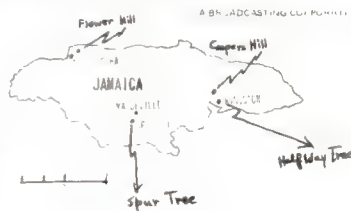

WBEZ *91.5 Chicago writes: "We will be going to stereo
 transmission in the very near future when our equipment in-
 stallation is complete." Tests in Milwaukee show WBEZ has ver-
 tical polarization; WMBI-FM *90.1, supposedly with 52000 v,
 appears not to be broadcasting vertically. A call to WEFM,
 which is supposed to change to WICV, confirmed that WEFM's
 viability continues. The man I spoke to rather confidentially
 expected WEFM to be the calls and classical to be the music
 format until well after snow falls this coming winter. An-
 other call to WITN-FM 104.7 Watertown WI confirmed that WITN-
 FM plans to move to 94.1 when the new Hartford application is
 approved for 104.9. When I told them Hartford [WI, of course]
 had received its grant from the FCC, this was news to them,
 and will undoubtedly prompt WITN-FM to hasten its frequency
 change.

In rather interesting news from Michigan, WSVG *99.7
 University Center, mentions in a letter of verification that
 "WSVG is the successor to WQOC Midland. The owners of WQOC
 donated the station, and some operating funds, to Saginaw
 Valley College about two years ago, and we have been on the
 air since November 10, 1971. We don't broadcast in S because
 the stereo generator used by WQOC became obsolete, and no
 longer meets the minimum FCC specifications. At this moment,
 we are broadcasting for six hours a day, five days a week,

from 4 pm until 10 pm. The college is in the process of
 selling the station, however, to a religious corporation in
 Midland because they [the college administration] consider it
 a "luxury" too difficult to support. We are awaiting FCC
 approval of the sale at this time, but we will continue to
 operate until it is sold. . . You are our furthest listener."
 From Pat Whelan, program director. Subsequently, I have
 noticed that WQOC has applied to move to Midland MI and
 increase to 100000 h; 818'.

KHKE *88.1 Cedar Falls IA, which has a permit to change
 to *90.9, is now on an 18-hours-per-day schedule Sunday-Thurs-
 day; 20 on Friday and Saturdays. They are supposedly on the
 air until 3 a. m. "Friday and Saturday," which may mean
 Saturday and Sunday morning—the continuation of Friday and
 Saturday night. KUER *90.1 Salt Lake City UT now signs off
 1 am seven days a week, instead of 11 pm as previously. The
 Jamaica Broadcasting Corporation sent a map which essentially
 corroborates the information given by Bill Dickerman as to
 the locations of Half Way Tree and Coopers Hill, Jamaica [see
 p. 17 May VUD and p. 9 April VUD]. Furthermore, the JBC says
 its Montego Bay station (92.1) actually transmits from
 "Flower Hill," about five miles NE of Montego Bay.

In other
 news, list
 WNDH 103.1
 Napoleon OH
 as S; ditto
 for WDOH
 107.1 Delphos
 OH. KDHL-FM
 95.9 Fairbault
 MN drops S
 once again.

Recently, I received a copy of the CRTC's proposal affect-
 ing FM broadcasting, as hinted at in the Billboard quote (see
 May VUD, pp 16-17). The proposal for Canadian FM boils down to
 three parts: 1) AM and FM should develop distinctively, with
 FM developing a diversity of programming aimed to attract
 audiences on a selective basis as an alternative to AM, which
 provides a more general service to its audience. 2) "Holders
 of AM and FM licenses will be required to reduce simulcasting
 by one half immediately after publication of the final policy
 document and to eliminate it within six months, except in
 specified unusual circumstances." 3) Discussions will go on
 to determine whether the public interest will be served by
 requiring all radio receivers for sale in Canada to have both
 AM and FM capability. These changes would initially apply to
 private FM stations but could be extended to the CBC stations.

As far as Canadian rules are concerned, this writer fully agrees with Rosenberg and Lewis (pp. 19-20 May VUD) about DXers' trying to bring about change in Canadian stations' identification requirements. I doubt, however, that if U.S. members contacted the FCC and requested bi-lateral agreements with Canadian authorities this would work. Knowing how hard it is to get action out of the FCC, it would probably be better for Americans to try to exert gentle persuasion on the Canadian stations directly — especially if they convince the stations that they regularly listen and enjoy their programming from across the border. May I add parenthetically that I do not require the hearing of "frequency" in an identification announcement to count a new station as heard; and my new DXing Constitution has eased up on the former requirement of having to hear city, state, or province in addition to call letters.

Perhaps taking a cue from the U. S. Federal Communications Commission is asking manufacturers of car radios and the big car makers why there are such great cost differentials between FM-AM and plain AM car radios, how much more money it would cost to make a car radio if all sets had AM-FM capability, and sources of car radio supply. The gathering of this data presumably would precede any FCC endorsement or rejection of legislation that would make all-channel, AM-FM radios mandatory in the U. S. Such a bill, with what I consider to be an unfortunate loophole that would allow for the continued sale of AM-only radios selling for \$15 and under, has been introduced in Congress.

All that out of the way, here now is the roundup of FM news reported by this column's readers.

Frank Aden, Jr., Boise ID, says KGVW-FM 99.1 Idaho Falls is still off the air as the result of a fire several months ago, and no one he contacted knows when they will be back on.

Joseph Bahr, Hato Rey PR, says the AFR-FM 90.5 station in Roosevelt Roads PR with 2000 watts is mostly rock and country, Mutual news, and Army and Defense Dept. programs. Applications for new stations have been filed in Vieques 98.9, Luquillo 92.1; with Cabo Rojo and Hormigueros competing for 92.1.

Robert Baker, Humboldt IA, gives further information on the shift of KHKE Cedar Falls to "90.9 [May VUD, p. 14]. "The antenna will be on the KCRG-TV tower near Walker IA." When KHKE moves to "90.9 and to the new tower this fall it will be Stereo. "Incidentally, the present KHKE daytime schedule is nearly all off-the-air pickup from WOI-FM Ames. This is the beginning of a state-wide public radio network for Iowa." KLYF 100.3 Des Moines (formerly WOI-FM) was to have begun broadcasting in stereo April 23 on a 6 am to 1 am basis from the 2000' Allaman Iowa tower, utilizing the syndicated Stereo Radio Productions service. I recently read where the FCC has returned the University of Northern Iowa's application to use KHKE's old equipment to run a second station on "88.1.

Andy Bolin, Charleston IL, reports that WILM "91.3 Macomb IL is now 8 and rock; WISU "89.7 Terre Haute IN is not and never has been 8. WJDU 94.1 Cincinnati (former WSAI-FM), "DJ-FM," is still automated rock, while MOR formats survived recent call letter changes at KEZZ 94.1 Little Rock AR and WFSM 92.3 St. Louis. WLRW 94.5 Champaign IL is now Hit Parade. The new KHAT 106.3 Lincoln NE announces 24 hours country music. This column congratulates Andy, who just heard his 1001st FM station: WMPS-FM 97.1 Memphis. "They were 8, but compared to the other Memphis stations they were extremely weak in signal strength." This would indicate that WMPS-FM, contrary to an earlier report, is still not operating with full authorized power of 100000 h.v.; 530'.

W. Bruce Dean, Seekonk MA, says WBLM 107.5 Lewiston-Auburn ME, went on the air March 1 with 30000 h.v.; 610'. They program MOR music 5 am to 7 pm and progressive rock 7 pm

to 5 am; not certain if the operation is 24 hours on Sunday night/Monday morning. "I received a friendly note from the station requesting reception reports, and am certain they would welcome responses from others." WCCM-FM 93.7 Lawrence MA advised Bruce that the long-awaited power increase to 430', 50000 should be available by the time this is published in the VUD. Bill Grant, Worcester, MA, reports hearing WCCM-FM with a much better signal recently, but still announcing as using the old power. Continuity departments in some stations are often slower in changing copy than engineers are in improving equipment. Bruce Dean sent an article from the Providence Journal-Bulletin in which it is stated that WTEV, a channel 6 TV station is withdrawing its objections to applications filed for some 11 educational FM stations in New England. Some of these applications go back two years, and if WTEV eases up on all of its objections, new public FM stations may spring up at Bryant College, Smithfield RI; Dean Academy, Franklin MA; Bristol Community College, Fall River MA; a day school in Weston MA [recently granted on "88.3-WRSB 10 w]; Rockland MA public schools; Clark University, Worcester [WCUW "91.3]; WHSR "91.9 Winchester MA; "WLSR" in Sudbury MA; and WTBS "88.1 Cambridge MA. Stations listed that are already on the air may be expected to receive power/antenna height increases.

Richard Clark, Lighthouse Point FL, sent several letters full of FL FM format information, noting that WZTY-FM 99.3 Cocoa is now 8 MOR, and that WRM-FM 98.3 Titusville has dropped 8 and duplicates an AM station 24 hours. WTHS "91.3 Miami (soon to be WLRN-FM) is now with National Public Radio. AFRTS 103.0 Guantanamo, Cuba, is the second station there. [Ken Simon, West Palm Beach, claims my Guantanamo Bay 102.0 listing is incorrect, according to the station's (or stations') chief engineer. VUD April, 1973, p. 9.] Dick also notes in Haiti the existence of Radio Lumière (4VUE-FM) 88.1 and a Radio Metropole 99.1, both Port-au-Prince. The latter, I believe, is 4VGA-FM 100.0. Dick also sent information on the FM stations and program formats of Mexico City and Guadalajara, which is essentially the same as given in Glenn Hauser's extensive Mexican FM listing of last month. Dick traveled to those cities and had the opportunity to tune in first-hand to their many and interesting FM stations. The Mexican government, incidentally, did write back and they cleared up several mysteries. Regardless of what others may think of government lists, I like them. They have the imprimatur of an official agency, and are presumably more reliable than what can be obtained by random listenings, travels, or interviews with equipment boys. Virtually all my powers differ from Glenn's, for example, and a few stations found in one list are not in the other.

In the second report and letter from Mexico, I gleaned the following: XHRM 99.3 Tijuana is deleted or will soon go off the air, perhaps a casualty of the U.S.-Mexican frequency allocation treaty affecting FM, while those surviving, "por convenio bilateral," are XHQS 96.1, XHQF 97.7 both Tijuana, B.C.; XHRZ 89.1, XHQT 93.9 both Nogales, Son. XHMS Monclova is corrected to read 99.3 [see April, p. 8], and XHIS Tijuana is included in the revised listing. The links are all listed (sans frequencies, some of which may be, as Glenn indicates, outside the FM band). The way I count up the FM stations, Mexico has 99 FM stations, excluding links, while Canada has only 92, including weak repeaters, like the CFFM-FM1, 2. . . group in B. C. These totals include both on-the-air stations and those holding construction permits.

From Nevada, Cliff Denney, KNIS 94.7 Carson City, says KNEV 95.5 and KSRN 106.9 Reno have MOR, with KNEV also classical music. KNIS is gospel, monaural, but will go 8 when permission to add vertical polarization is received. KUNR "88.7 Reno (2000 +450') has an educational format, featuring classical music.

Michael F. Collins, Stratford CT, mentions that WPT *90.3 Westport Ct [Staples High School] was to have gone on the air for one day, May 26, so that area residents can see if there's any interference to their FM and TV sets; this before the Westport Zoning Board will give its approval for the transmitter site. If there is no objectionable interference, WPT *11 will begin regular operations June 2, and will be on the air all summer long with 330 h.v.; 145'. WPKN and WSHU continue to operate in their fight over the town of Trumbull over alleged interference [see May VUD, p. 17]; they're taking the case to the Court of Common Pleas. Another station on the same hill is WPSB 99.9 Bridgeport, increasing to 25000 h.v.; 660', but directional to protect WEEB-FM Easton PA. CKRL-FM *89.1 Quebec PQ has been on the air since March; by July 1, WENU (former WATR-FM) 92.5 Waterbury CT will be \$ MOR. New York's WNBC-FM 97.1 will switch to a top 40 format, while the ABC-FM stations, Mike says, will be switching to a new and as yet unannounced format; "KSFZ 103.7 San Francisco will be the first to switch." In a list Mike sent, he does not list 97.5 WALK-FM Patchogue NY as \$, which I thought it was. WHOM-FM 92.33 New York has MOR with Spanish announcers. Contrary to the April report [p. 10 VUD], WQAG Hamden and WOTQ Hartford, both on *88.3, will not share time. For *88.7 correct the WNHU listing to read "West Haven CT" 1700 h.v.; 150'; the sole survivor on this frequency of what had thought to be a three-way share-time arrangement. [WNHU moves from New Haven CT.] Finally, Mike sent an ad from the 1951 Broadcasting Yearbook in which WASH 97.1 Washington DC claimed that "Thousands of WASHINGTON listeners no longer tune in, or rarely tune in AM," which was probably true, since Washington was one of the early markets with a high FM set saturation, and, of course, WASH still exists [22500 h.v.; 690'].

Bill Dickerman, Williamsport PA, says neither WRAC-FM 102.7 nor WILQ-FM 105.1 have \$, nor plan to add it. But WVIA-FM *89.9 Scranton PA is now on the air fulltime; studios Pittston PA; transmitter on Penobscot Knob. WEEP-FM 107.9 Pittsburgh is now \$.

FM REPORT 24¢ (Cheap!)

In U.S. postage from Michael Dornier, Jr., 1409 Hymelia Ave., Metairie LA 70003. It's Mike's Fifth Progress Report on the FCC FM allocation table, and expected to be ready in June. It will cover 1) standard metro areas having no public FM station; 2) the growth of FM in the southeastern states with a complete list of vacant channels therein; 3) if the FCC gets the info in time, a report on the U.S.-Mexican FM agreement. Order your report direct from Mike, but expect up to a month delay, due to his expected upcoming move. In local schedules, WNO *89.9 New Orleans operates 8 am-12 am 7 days a week now; WKRM 92.3 LaPlace LA does not operate 24 hours, as reported before, running only 6 am-10 pm Sun-Thurs., 6 am-2 am Fri.-Sat. "I taught the boy who runs the weekend late show and clued him on the WFOA and DXing. His name is Jerry Lousteau, and he's likely to QSL DX reception." Mike comments on Allen Rockford's observations in the April column re WIBX-FM 96.9 Utica NY, which operated with 9 kw ERP from 1946-54. "They have held their new CP since 1968—a heck of a long time; I wonder what made the FCC let them keep it inactive for so long." (Present permit is for 98.7.) "Speaking of inactive construction permits KIKS-FM 96.1 Lake Charles, along with KIKS Sulphur, has been sold to a local entrepreneur; KIKS-TV 26 has been deleted, I understand. Victor Muscat, previous owner, has a good track record of letting CPs remain fallow. Perhaps the station will be activated soon. Fallow WFXM 95.5 Jackson MS has received an extension of its CP to July. I wonder if the CP for WFR-FM 107.1 Hammond LA has expired; it was granted a year ago, and I note that WFRP (AM) is being sold; no mention of a WFRP-FM at all."

Mike Dunn, Armdale, Nova Scotia, says CHFX-FM *96.1 Halifax NS has an application in to increase power and go stereo, and a format switch to easy listening. Mike, I wonder if you could check on the radiated power of CJCBC-FM 94.9 Sydney NS? I list it at 31500, but recent CRTC data show it as 675 watts.

Pat Dyer, San Antonio, heard KNIC 107.7 Beaumont TX testing with 54000 249', and he's getting together a list of baseball FM networks with help from Frank Merrill.

John Ebeling, Bloomington MN, says rocker KESD *88.3 in Brookings SD operates 6:40 to midnight, 38000 h, 17500 v; 610'. That's from 6:40 a.m. CST or CDT.

Richard I. Eddie, St. Louis MO, sends much St. Louis FM information, noting that KONA 102.5 is a hedge-podge of programs, seeking a frequency in the educational band, while rumor has it the new owners of KONA's 102.5 facility will boost power to 110 kw kw go top 40 rock and charge calls to KEKZ.

Robert Eddy, Newport OH, says WCMO *89.2 Marietta is seeking higher power (9234; 188') on 88.3. He sends a clipping concerning the fact that the FCC has been ordered to conduct a hearing on the format change of WGLN 105.5 Sylvania OH with progressive rock to WKEZ with MOR. Anyone know if WKEZ is \$?

Al Ellis, Brantford, Ontario, sent a tape of good WQLN-FM *91.3 Erie reception, with broadcasting charging physically from one campus studio in the area to another. Al Claims that he has written to "My little old powerful five watter at Tillsonburg" (CKOT-FM 100.5), but no answer yet; they did apply for higher power, however. "CFRS Since ON, I understand, has been granted permission to operate a new FM station, but I do not know the frequency." The provincial government is apparently going to save CJRT *91.1 Toronto [see May VUD, p. 16], but a union officer was mad that the move would deprive 48 Ryerson Institute floor cleaners of work.

Bill Frahm, Boise ID, says KBKZ 92.3 Boise is now 24 hrs. rock, while KB01-FM has finally upped modulation to a point "where you can hear something besides the SCA! This should improve the DX receptionability of KB01-FM 97.9 Boise. Both KBKZ and KBXL 94.1 Caldwell are planning to move to the same tower on Deer Point, 16 mi. NE of Boise, about 2000' above the average terrain, and one of the Nampa AM stations will apply for FM and join them. In Oregon, Bill reports good long-distance reception of KB0Y-FM 95.3 and KMTT 93.7 Medford, while KMTT's translator, KZ65AA 100.9, 6 mi NE of Chemult OR, seems a lot more powerful than 10 watts input. It made it out 75 mi. to the east and south; 50 to the north of its site. KZ65AA should be a good possibility for E's, thinks Bill; even for meteor scatter and aurora! Bill says KB0Y-FM's audio is badly distorted.

Bill Grant, Worcester MA, sends a map showing Bermuda's Devonshire Parish, and Prospect site therein, which is just W. of the town of Hamilton. ZBDM-FM 89.1 and ZFB-FM 94.9 both transmit from Prospect, but are probably "licensed" to Hamilton. WCUW *91.3 Worcester has completed its tower installation "and should begin operation in June. WERS *88.9 Boston is conducting a \$5000 fund drive to add \$ next school year; WLTJ *91.5 Lowell MA is mostly rock and is \$; ZBDM-FM & ZFB-FM have a varied musical format and are both \$. ZFB-FM simulcasts ZFB from midnight to 6 a.m. Bill heard WEZZ 97.7 Clanton AL in mono by skip, and not \$ as previously listed. WNHV-FM 95.3 White River Junction VT is \$, MOR, as is WNBH-FM 98.1 New Bedford MA. Bill sent along an interesting, but sarcastic review of the Boston area FM stations from a local paper. Typical comment: [Concerning WCOP-FM 100.7] "More muzak. A more dismal use of 100,000 watts (sic) of power has yet to be devised. Dead air would be an improvement." . . . or WSSH 99.5 Lowell: "The station refers to itself as 'Wish' radio. The listener should be wishing for the right to change the dial. The only way you could ever remember a station like this is by the name

created by the loose phonetic interpretation of the call letters." A number of station powers were incorrectly reported, which prompted reader Richard B. Wood, Boston, to write a letter to the editor which said in part: "Since the relative merits of programming are subjective I won't argue with David Bieber's opinions. However, I was disappointed to find several, readily available, figures incorrect. This leads me to suspect his research. Mr. Bieber gives some stations more power than they have while gyping others of what is rightfully theirs. Some he says are stereo when, in fact, they are not. For instance, WAAF 107.3 Worcester MA is 1750 watts, not 50,000. . . WERS *88.9 Boston got the worst deal of all. They are 18,000 watts, but were allotted only 10. . ."

Glenn Hauser, Von Ormy TX: "Texas noncommercial stations are having their problems. KPFT *90.1 was off about 10 days in mid-April due to transmitter failure and lack of money for parts; off and on sporadically since (normally 24 hour schedule, silent period 2-6 AM Wed.). KNCI-FM *91.3 went off for spring vacation but, strangely, has not returned as of early May [see report about grants, 2d page of this column; they are probably installing new equipment]. KUHF *88.7 Houston has been off more than on since it returned last December; quite sporadic; no NPR affiliation resumed; sometimes comes on to cover ball games. Both KUT *90.7 Austin and KPFT have significant blocks in Spanish (or rather ex-Mex, hi). I have my doubts about the Nicaraguan list [VUD *90.1, p. 9]; why would YNN-FM 97.9 (certainly more than 30 watts) be the only one I get on Es?"

Jim Hughes, news director of WCEN-AM-FM Mt. Pleasant MI, and "Trout Kings" of the Kalkaska trout festival, says WCMU-FM *89.5 is blocking TV channel 6 in Lansing and, in some places, Bay City channel 5. "Local viewers were 'up in arms' but have simmered down now. However, many feel that educational institutions should not have radio stations to the point of interfering with other stations. WMHR *91.5, the 10-watter, is a training ground type of station and has a varied format of music and CMU sports. WCMU, the 100000-watt baby, is on 24 hours a day in stereo."

John Harolson, Memphis, says local *88.5 owned by the city school board will broadcast in § and have virtually WLYX *89.3 has applied for a power increase from 10 watts; the new KASU *91.9 Jonesboro will have §, V when the power increase to 100,000 (510') comes through. KBFC 93.5 Forrest City AR is §.

Hank Holbrook, Chevy Chase MD, mentions that WNYU *89.1 is on regular schedule with rock, sharing time with WFUD Teaneck NJ. WNYU is in New York city. Hank heard WAFI 97.7 testing May 12 with country music (Wilford DE). WVIA-FM *89.9 Scranton PA heard testing April 21 and on Monday April 23 they were on regular schedule. "Said they would have country, folk, classical music and information programs. . . WKOU *91.7 Philadelphia gets out pretty well for having only ten watts!"

Fred McCormack, Des Lacs ND, reports great difficulty in DXing stations in nearby Montana. KMOT-FM 93.7 Minot, he says, has changed from rock to MOR "with a very good sound."

L. R. Mitlin, Rock Hill SC, notes that WSMU 106.3 Starkville MS is now §; rock day, country after 4 p. m. WBIE-FM 101.5 Marietta GA is now §, as is WPLD-FM 103.3 Atlanta.

Eric G. Norberg, KMPC radio, Los Angeles CA, sends detailed FM format information for CA, including some possible deletions or other changes. KIBS-FM 100.7 Bishop CA he believes is deleted, while KMAX 107.1 moves from Sierra Madre to Arcadia. "When owner-operator moved to Arcadia, he had the station re-licensed to Arcadia. It's a real mom-and-pop operation." Similarly, KJLH 102.3§ moves from Long Beach to Compton CA. 93.1 KGBS-FM Los Angeles is not §, while KTMS-FM 97.5 Santa Barbara is.

Fred J. Nordquist, North Syracuse NY, sent detailed FM format information for his state, noting that the music of the Christian Broadcasting Network [WOIV DeRuyter, etc.] sounds almost like rock and roll. WHLD-FM 98.5 Niagara Falls NY does not have §, while WPDH 101.5 Poughkeepsie and MOR music does. WRUR *88.5 Rochester is not allowed to operate the full power of 19500; 120' [still 10 watts?]. Without § is WOLK 93.7 De Pew NY, while WMRV Endicott 105.5 has it; MOR.

Les Prus, Manhattan KS, mentions that both Hutchinson KS stations have §: KSKU 102.1 MOR and KWBW-FM 102.9 with country. KJCK-FM 94.5 Junction City is confirmed with § and rock. Local KQSB *88.1 is off the air until classes resume in the fall. KMKF 101.7§ Manhattan has MOR from 0600-1900 daily; rock from 1900-0100. KSKG 99.9 Salina, mono, used to be religious programming but now appears to be all rock. WIBW-FM 97.3 Topeka § has been sneaking more pops and soft rock into their formerly all-country format.

Shelby Remington, West Haven CT, notes that WNYU *89.1 New York took the air May 4 and is stronger at his location than share-timer WFUD Teaneck NJ. Both WSMU *91.1 Fairfield and WHS 104.4 Middletown are mono, not §, as previously listed. WQAQ *88.3 Hamden, WMHR *88.1 Monroe, WGCT *90.5 Guilford, WMJL *88.9 Hartford, nor WNHU *88.7 West Haven, all CT, not on the air when Shelby wrote; he was not sure about WMPY *90.3 Westport and WQTO *88.3 Hartford.

Allen Rockford, Syracuse NY, had earlier reported that WKAL-FM 95.9 Rome NY was in §, but about 2 weeks later they stopped and have not been § since. "I don't know why they were § for such a short time unless they were testing and have some plans for separate programming. WROC-FM 97.9 'stereo 98,' is now full § 24 hours a day with MOR and occasional ball games. Music is on the bland side."

Bruce Rummel passes on word about a new station grant not previously listed: Chicago IL *88.5 10 for Bogan High School, 3939 W. 79 Street, so add this station to your list of stations having a construction permit. Bruce [whose address is now Box 103, Wertztown PA 19539] gets FCC news releases and could also find no record of a KQOL Yakima WA.

Richard Steinberger, Hudson MA, notes WCOU-FM 93.9 Lewiston ME is now on at 5 am to midnight, country music, while WBLM 107.5 Lewiston is § with soft rock. WFSB *91.3 Framingham MA with just 10 watts was heard with an over-modulated signal.

Paul Traska, Buffalo NY, sends word on 93.3 Jamestown NY, which is changing its call letters from WJTN-FM to WJSE: "The Wonderful World of Stereo Entertainment." MOR music will be heard, except for Concert Hall weeknights from 9 to 11.

David L. Walcutt, Carbondale IL, says WDNS 98.3 Bowling Green KY is §, MOR. KSGM-FM 105.7 Ste. Genevieve MO, which is going to 70000 h.v., claims they will "soon be stereo." WTAO 104.9 Murphysboro IL will soon be moving its antenna to atop a forest station tower to eliminate local TVI. "WTAO is one of the nicest radio stations I've ever seen. . . their buildings blend in with the surroundings in a residential area. In your February column, I noticed Richard Wood's question about the programming of WMGL 98.3§ Pulaski TN. They advertise; ads were heard for the Pulaski Citizen; also for a local milk company." They're country late night; MOR the rest of the time.

Richard C. Wood, Baton Rouge LA: WQXY 100.7 B. R. was off the air for about a day because of fire. The new AK station is in Shemya, a well-known Aleutian I. base. CHOM 97.7 which is listed to Montreal [May VUD, p17] is sometimes considered a Westmount PQ station: an English-speaking city within French Montreal and PQ. Thus, if Westmount is its "coverage area," the majority language should be English; otherwise French.

And that's 73 for this month! *Bone*

###On Apr 20, ANIK II launched from G.Kennedy .. rented to American net
###In Apr, the people of Ross River, YT set up their own pirate stn of
ANIK rebroadcaster in Whitehorse. This summer ORTC will approve licence.
###With lax ID rules in Canada & many xlaters in existence you may
expect problems this summer. Our CDN GUIDE is for you. For more info
see past VUDs or write JJ ROSENBERG. We'll have copies at Dunkirk.
###In those OECA & GLOBAL applications, effects not given for channels
not allocated to these regions.. Imagine 22 Windsor with 20 Detroit &
megawatt-22 in nearby South Bend! The beth of us are definitely
fighting these at ORTC hearing Jun 26 by mail &/or in person.& With
controversial education outbacks sending CJRT-FM off air, who needs an
OECA xmtr every 40 miles!

Have a DXful summer, M & J

If you still need transportation and would be interested in traveling with another DXer (splitting gas expenses) please explain: (We're not guaranteeing a ride, but will make every effort to put you in contact with a DXer in your area that can provide a ride.)

The sooner you write, the better chance you'll have. If all else fails, there's always Greyhound!

About what time, on what day do you plan to arrive?

Please check, if you plan to bring any of the following: () DX tape (reel to reel)

() DX tape (compact cassette) () 35 mm slides () 8 mm DX movie () Super 8

FEATURING FM DX FROM LOUISIANA TO MARYLAND

Michael Dorner, Jr., 1309 Hymelia Ave., Metairie LA 70003

Times CST. Apr. 20: new WTUB 105.7 Troy AL in faintly from 2030; building thru 2303; live annocr nites w/ mixture C&W & Top 50. \$ 2300 ID "\$ wTUB from the heart of Dixie..." Opening was strong to E, caught WJLN 104.7 Birmingham 2329 w/ DJ & spot for "Angry Revolt"...noted later that opening was also strong to W, but was busy w/ other things.

Apr. 23: KNOE- 101.9 Monroe LA at 0000, live dj, \$, oldies & top 50; gd sig, quite clear; s/off 0100 w/ "Be Syoll & Hear" rel; "Dixie" & SSB; s/on daily 6 am... 0100 WMEZ 94.9 Pensacola FL EZ atmt & spot for Elving's FM Atlas.

Times EDT. Apr. 30: excellent trop opening, long awaited after a vy stormy winter. (Yes indeed, REW). WKNO- 91.1 Memphis TN live annocr w/ jazz recordings, Glenn Miller mx, etc., \$, building, gd qual sig, s/off 2200, returns 8 am daily. This pgm hrd several days later, seems to be a nightly fixture... 2140 WIRB- 96.9 Enterprise AL, atmt heavy RR, sounds like new power increase now in effect. 2142 spot for "The Hub" in Urzark, \$... 2300 WCRT 96.5 B'ham AL w/ EZ mx, "Swing Softly w/ WCRT-", \$, first time I've copied this stn so clearly, despite noisy atmosphere... 2303 network nx ending, PSA, pollution, fading, wonder if was long-sought WABC Columbus MS...[You omitted freq., Mike, assume 103.1, REW]. The usual MS-AL-w. FL FM in and B'ham stns, too, all quite strong... WCOV- 92.3 Montgomery AL noted w/ "Hit Parade" atmt format, \$, quite strong.

May 1: long sought stns came in during the wee small hrs w/ a fine opening which drifted quickly w. 0504 KOTN- 92.3 Pine Bluff AR w/ Top 40, // AM. "The Mx. Machine", live annocr; mono, poor sig, fading severely...0513 WHTB 92.7 Talladega AL, weak but firm, atmt EZ, \$ 93, WHTB, spot for whitney's Tire Store. This Class A has an 870-ft. tower!... 0530 new WA8B- 97.5 Mobile out of nx w/ Chris Elliot, strong, \$, RR... 0535 WRBL- 102.9 Columbus GA out of nx, into MoR mx, strong... 0536 WATM- 104.1 Atmore AL out of nx, 62° and predicted showers, PSA-rare stn, heavy QRM... 0540 WHYD 107.3 Columbus GA, \$, C&W ID in passing... 0558 WKLD 97.7 Clanton AL w/ Gospel mx, spot, Louie's restaurant, at times snowed under vy hvy QRM, perhaps from 97.7 Opelika AL... 0605 WRFS- 106.1 Alexander City AL, vy ancient FM still operating w/ original 4.6 kw power; nx, spot...0610 long-sought WFMI 98.9 Montgomery AL // WQTY AM, MoR mx,item on KY-CD game, 0617 PSA for concert composed in honor of George Wallace to be played on Capitol steps... vy weak sig... left for work after pulling at 0700 WCLD 103.9 Cleveland MS atmt EL, song broken for ID "\$ 104, WCLD Cleveland" & nx. This brings my total to 381 stns. Perhaps I'll break 400 this spring. 73.

Hank Holbrook, 7211 Chestnut St., Chevy Chase MD 20015

DX-ing from Fair Haven MD cottage overlooking the Herring & Chesapeake Bays.

We opened up the cottage on Fri. Apr. 13 and commenced the 1973 FM DX Season. The following stns have been logged & reported.

	mi	power	shown	on QSL	time EST
89.3 WQED Pittsburg PA	215	43 kw	4/13	1735-1823	Fairly gd - CL mx w/ nx & wx at 1800. QSL by letter
101.7 WNNN Canton NJ	100		4/13	2045-2120	Strong (local) Show tunes/ ads; nx at 2100
91.3 WQLN Erie PA	280	35 kw	4/14	0558 s/on-0830	Poor/fair CL mx. QSL card (mimeo post card)

104.5 WQRK Norfolk VA	130		4/21	1045-1115	- GRK "the Great Blow-off" RR. Few ads, PSA's (drugs) Gd. Ex-WTII
89.9 WVIA Scranton PA	180		4/21	1225-1315	Equipmt. tests. Noted on R 4/23. Good on the Bay. Will carry

Hank Holbrook (Cont.)

jazz, folk, pop. CL mx. Info pgms. Variety.

102.1 WRXL Richmond VA 100

4/23 0527-0610 Gd. Ex-WRNL. \$ MoR mx. Vv few ads & PSA's. Nx & wx. 0600.

Recent verie in from WKDU Philadelphia after many tries. Returned my PP card but did not list power. I presume I can count this as a 10-watter. Often noted on Bay late at night when stns on adjacent channels off - often good. FM veries at 637 stns from 31 states, Ont., Que. and Man. plus Bermuds, Cuba & Puerto Rico. Good DX. (Thanks for your support in yet another thin month of little trop and no skip for all of us, Hank. Other comments on format appreciated and sent on to Club HQ. REM)

Lowell E. McCown, Box 416, Martin KY 41649

Nothing new hrd here since Dec. 17, 1972. Have been reporting the hold-outs from last year. Some it has taken 3 rpts. Usually I send a form letter w/ the 3rd. report (I don't quite follow this, do you mean a prepared verification sheet? REM), and if that doesn't get results I don't waste any more time or postage w/ them; I don't feel it's worth pursuing any further. After 3 rpts I still have nothing from: KKFM CO; KICT KS, KITY TX. My 3rd. KITY rpt was returned marked "insufficient address". Have they moved from San Antonio? (No, but they have changed format from C&W to EL, which might imply other changes such as address. Try telephone inquiry, free, inquiring after number, then address. REM) Can someone give me their complete address? Today, rcvd ltr from KTQM NM for state #32 verified, after 3 rpts for Jun. 2, '72 reception. I have hrd 3 stns from SC, but no USL's. (I have 2 hrd, both verified, REM) Totals stand at 117 verified; 32 states ver'd, 32 hrd.

I would like to make a suggestion for the bulletin: each month run at least $1\frac{1}{2}$ p. on some member telling about their career as an FM DX-er. I would like to know more about our members other than just what stns they are hearing. I even enjoy a little controversy occasionally, hi. (Me too, REM).

After hearing FM DX via Es I have been tempted several times to build some equipment and give 6 m. a try. Most of my ham activity, though, is on 75 and 40 m. I haven't been active the last couple of yrs due to no space for antennas. 73 till next time. (Please tell us exactly where Martin is, Lowell, REM).

Convention Notes...

ATTENTION SOUTHERN DXERS!!! New Orleans DXer, Ron Le Blanc, is hoping to drive to the WTFDA convention in Dunkirk, New York. But Ron needs riders to split the expenses and driving duties. Ron has a full size station waggon and can take up to five passengers. If you're anywhere from the south of Texas (like Joe Gragg) to all points in between New Orleans and New York, and need a ride, drop a line to Ron today! If Ron gets at least four riders, it could cost as little as \$25 for round-trip driving expenses!

Write to Ron Le Blanc at: 2524 Arizona Drive,
Marrero, LA 70072

Other DXers who can provide rides, should write to convention host Bob Seybold (see page 31) or Hq as-soon-as-possible.

WESTERN FM DX

Editor:
Mike Dörner, Jr.
1409 Hymelia Avenue
Metairie, Louisiana 70003

DX FROM THE LAND OF BEGINNING AGAIN

(Ed. note: Because I have not left for overseas as soon as I had expected, I am able to continue the editorship until a new editor is announced.)

Frank E. Aden, Jr., WDX7DXA,

915 South Curtis, Space 71,

Boise, Idaho 83705

On April 1, 1973, all times MST: (Here Frank lists a group of stations from western Oregon, giving only call, mhz and time. WUD doesn't print simple lists of stations; we want everyone to participate, but reports must have, in addition, city, indication as to mono or stereo, type of music/identifying slogans/type of program, and perhaps an indication as to signal quality. E.g.: 0441 KWIL-FM 105.1 Albany, Ore (000 miles), \$, spot for hardware store, atmid rock, steady but weak... 0445 KLOO-FM 106.1 Corvallis, Ore (000 miles), //AM, top forty, young anncr, mono...) Very good results. KSLM (105.1, Salem OR --ed.) was extremely strong at 530pm. Never seen auroral reception this strong before. The opening lasted to about 6:30 pm. Equipment: Sony ST 80F; Wineguard antenna with preamp. As of June first I will be living in Bend OR. Bend should be an excellent DX site. More room for antenna, I hope. (You'll have almost a clear band--100.3C has recently been granted in Bend, and there are two applicants for 94.1C there. But any way you Bend it, you should be doing great DX. --ed.)

Pat Dyer, WA5IYX,

5315 Silvertip Drive,

San Antonio, Texas 78228

Apr 19: 2123 KELT 94.5 Harlingen TX - \$, auto MOR, ID (235 mi)... 2200 KAMC 94.9 Arlington TX, ID, mono rock (245 mi)... 2302 KCIR 107.9 Corsicana TX (215 mi) ID s/off (KBUC-local on)... 2329 KOAX 105.3 Dallas TX (250 mi) ID, Stereo 105, EL... 2336 KNUS 98.7 Dallas TX, "K-news 99, Stereo rock"... 2354 KDNT 106.1 Denton TX (260 mi) local ads, MOR mix rock..

Apr 20: 0014 KXOL-FM 99.5 Fort Worth TX (240 mi), wx and ID, MOR... 0045 WFAA-FM 97.9 Dallas TX, EL "The Velvet Sound, Stereo 98"... 0100 KSCS 96.3 Fort Worth TX, news c&w format (should be a solid gold c&w format, ex-WBAP-FM -- ed.)... 0101 KAFM 92.5 Dallas TX, local ads, rock (ex-KRLD-FM, ed.)... 0111 KVIL-FM 103.7 Dallas TX, ID, MOR... 0200 KBUY-FM 93.9 Fort Worth TX, ID at end of news... 1000 KVMV 96.9 McAllen TX (215 mi), end Spanish pgming, ID... 1035 KQXX 98.5 McAllen TX, local ads... 2228 KAMC ID "FM 95".

Apr 21: 0010 KNUS, contest clues... 0011 KSCS, ID... 0015 KXOL-FM ID, wx... 0049 KAFM, ID... 0050 KBUY-FM ID... 0058 KOAX local ads... Apr 29: 2020 KAMC local ads, 2215 KLBK-FM 94.5 Lubbock TX (350 mi) EL \$... Apr 30: 0130 KXOL- auto MOR ID... 1100 KGAF-FM 94.5 Gainesville TX (310 mi) ID and wx... 1122 KAMC, news... 1157 KNUS, ID...

May 1: 0030 KSCS wx; 0031 KAFM ID... May 2: 0038 KSCS ads... 0052 KAMC ID, 0058 WFAA-FM short news; 0107 KXOL psa and slogan ID as a "Gold Mine"... May 5: 0059 KAMC ID as Arlington-Cleburne... May 9: 2357 KAFM 105.3 Nacogdoches, TX (280 mi), news-wx, MOR... May 10: 0017 KSPL DiBoll TX, ID... KCAW-FM 93.3 Prt Arthur TX (280 mi) local political ad (KITV- on), C&W format... 0033 KAYD 97.5 Beaumont TX (275 mi) full ID as 24 hr \$, El format, with local KEEZ- 97.3 on (nice catch! --ed)... 0100 WTAW-FM 92.1 College Station TX (160 mi) s/off anncmts, rock... 0149 KNUS ID... 0158 KRAL-FM 98.1 Texarkana TX, ID simulcasting KCMC 740 khz, c&w... 0245 WFAA- 99.8 ID, 97.9... many other Dallas-Houston re-logs.

The May 9-10 loggings were made with a revamped SX-62. It's not as sensitive as it could be but the selectivity (my first 97.5 logging with nsp KEEZ 97.3 here sure makes the FM band look different. KITV 92.9 San Antonio switched format from C&W to

MOR recently... Now if only the slumbering Es season will get into gear... it's been sparse even on 30-50 mhz, so there's a long way before the FM season is with us. 73.

Glenn Hauser, Box 300 (new), Von Ormy TX 78073 (CST always) (Apr 9 - May 6)

A Mexican drifter, Arkansas #2, and an amazing coincidence were the only highlights of a rather ordinary month devoid of Es and extensive Gulf tropo. Receiver is a Harman-Kardon F1000T tuner with Lafayette LA224T amplifier; CADDO IPA always boosts FM signals a great deal. Antenna, a 10-element yagi atop an Archer rotor about 20 feet above ground. Freq measurement by oscillator harmonics from Hammarlund HQ160 3W SW.

MEXICO (continued from page 4)

Many "L" (only) stations carry as their only interconnected program, aside from special events, "Imágenes de Nuestro Mundo", Sundays 1800-2000, originating at net-4. Net-8's Sunday schedule seems to have changed to 1330-2430; other minor schedule changes can best be followed by taking advantage of

A SOURCE FOR TELE-GUÍA: In McAllen we persuaded an optometrist who has a side line supplying Mexican magazines to Americans, to provide Tele-Guía (the Mexican TV Guide) to WTFDA members on an informal basis. You may request any number you wish, at any interval you wish (e.g. one a month, weekly, one only--but he cannot guarantee an unbroken weekly 'subscription') at the price of 25¢ a copy (subject to change); no envelope necessary. He'll send the edition sold in Reynosa, which include all Mexico City stations (ergo all network programs) plus an insert for XEIB-3 and XHAW-12. Thanks to Dr. Hammond, 211 S. Main, McAllen TX 78501, for his kind cooperation!

Odd 'n' ends from Tele-Guía: More and more pressure is building up, judging from viewer letters and editorials, to expand the other networks, particularly net-8, to cover as much of the country as net-2 does (either this, or switch more sports programming from 8 to 2!) Another letter echoes our complaint about network service being chopped off at 0030 sharp, regardless of what program may still be in progress. For the July 1 election, political spots are being allowed on Mexican TV "for the first time in history". In the ratings, "24 Horas" has fallen from first place, indeed out of the top ten. XELPN-11 is upgrading its technical standards and foresees a changeover to almost full color.

We have compiled the latest addresses and managers' names for virtually every Mexican FM and TV station. If you can't wait for the 1974 World Radio-TV Handbook, we'll be glad to supply any you may need for a self-addressed stamped envelope. ...73 y hasta la próxima!

JUNE 1973

It has recently come to my attention in a rather roundabout fashion that some members have been encountering difficulties with various portions of my recent special 3-part series on Es (VUD Dec '72, Jan-Feb '73). (The articles were done in response to a HQ request last August). For those with problems that would like additional information or explanations on specific points, I'd appreciate hearing from you. Comments, criticisms, etc. are welcomed as future VUD use of such technical articles by myself and others hinge on membership acceptance.

So far, a very slow Es season here.

WESTERN TV DX

June 1973

Note these addresses and deadlines for summer WDX.

You have certainly noted Glenn Hauser's increased Mexican and other Latin-American identifications since last month. Whether he has mentioned or not, it is safe to say that his Mexican TV and FM DX reports and articles (along with similar contributions by Richard Wood) are the most accurate such information available anywhere. Follow these sources closely during such DXing this season.

Dennis Park Smith
1200 W Sacramento Ave, #15
Chico, California 95926
Deadline: 12 June
450 Poplar Avenue
Wasco, California 93280
Deadline: 5 July
c/o Ben Tharning
1631 Sunnyvale Ave.
Walnut Creek, CA 94596
Deadline: 5 Aug.

Tropo in April was hardly spectacular, but was rather consistent in its confines around south Texas, the farthest being Las Lajas, Veracruz VHF-TV at 695 miles. DXers further north weren't neglected entirely; those in Idaho and Minnesota caught some aurora DX on VHF (ch 6 & 50 MHz) on April 1, 14, 26.

There have been lots of tornadoes but very little Es. Es dates: Apr 10 13 18 May 2 9
What Es did occur was noted only in south Texas and # reporters: 1 1 1 1 1
very little of that, in contrast to earlier months. MUF at least: ch 5 3 3 3 2

Frank E. Aden, Jr., 915 South Curtis, #71, Boise, Idaho 83705 (Spring thru Apr) (MST)

Little TV DX here; hoping for a good season. The only DX noted lately:

April 1 aurora 1659 KOIN-TV 6 Portland OR (audio only).

I've never seen aurora this good before. No video due to local interference on my Arvin 9-inch TV. Antenna was pointed NE!; nothing came in from the NW.

I will be living in Bend, Oregon as of June 1. Bend should be excellent for skip. 73.

James J. Stiles, Carleton College, Northfield, Minnesota 55057 (Spring thru Apr) (CST)

While I do have some interest in TV DXing, my primary interest at this time lies in working the 6-meter band. My call is WBØIWG. Much of the information I will be supplying in my reports will therefore concern activities on 6-m. Hopefully, this will be of interest to those of you who DX the low-band channels. I am always interested in knowing when channel 2 opens, hence I scan all the reports carefully, but tend to get rather upset whenever I discover that I've missed an opening...Hi!

My equipment for 6-m includes a Swan 250C transceiver with NS-1 noise blanker. The antenna is a six-element beam at 70 feet. The TV here is a Zenith 21", and the antenna is a 10-element all-channel model.

No E skip has been observed from this QTH thus far this spring. Aurora has been quite prevalent, however. An excellent opening occurred April 1 from 1400 to 2030. Wisconsin, Ohio, Michigan, Indiana, Illinois, New York, Missouri, Iowa, Tennessee, Kentucky, Nebraska, Kansas and South Dakota were the states heard and worked during this period. On April 14, from 0230 to 0400 more aurora was noted. New York, Michigan and South Dakota were worked, and Wyoming was heard as well. On April 26 at 2214 more aurora was noted, but only the northernmost areas were affected. A Minnesota station near the Canadian border was worked. (Were these on CW, AM, or FM, Jim? dps)

In case anyone is interested, I have several Channel Master #7008 traps for sale. The units consist of two tunable traps each, and when tuned to any frequency in the range from 50 to 108 MHz attenuate it by 60 db...great for adjacent-channel interference. Also I have a dual gate MCSFET preamp tuned to channel 3. Its bandwidth is about 3 MHz, noise figure is about 2.5 db, and the gain is in excess of 30 db (there is a manual gain control on it). While there is some distortion of the picture (it loses some resolution), it is still quite easily viewed...and it can't be beat for weak tropo DX.

(Thanks very much for your report, Jim. Pat Dyer (WA5IYX) also follows DX conditions below channel 2, as does his VHF Utility DX column. He is active on 6 meters (50 MHz band) also, though I don't know if his column deals much with such DX. You and Pat may have similar propagation interests, and between the three of us, we can perhaps figure out which information is best for which column. dps)

Robert Davis, Jr., Box 13581, San Antonio, Texas 78213 (Spring thru 20 Apr) (CST)

This is my first report to WUD since becoming a member in late 1972. I don't usually have time to DX except on holidays and weekends. I have nothing great to report, but I wanted to contribute something as a member. New loggings are underlined.

All gw/tr. April: (20) 0020-0046 KDFW-4 Dallas TX
19 2230-2331 KEDT 16 Corpus Christi TX 0029-0050 WFAA-8 Dallas TX
20 0016-0023 KEDT 16 Corpus Christi TX 2140-2223 KTVV 36 Austin TX

(20) 2225-2235 KVUE-24 Austin TX
 2300-2304 XEFE-2 Nuevo Laredo (s/off)
 2235-2245 KGNS-8 Laredo TX
 2200-2300 KZTV 10 Corpus Christi TX

(20) 2230-2330 KRIS-6 Corpus Christi TX
 2315-2330 KPRC-2 Houston TX
 2200-0100 KIII 3 Corpus Christi TX
 2200-2330 KTBC-7 Austin TX

As you can see, all of these are semi-locals but the UHF's were my first ever to log. The VHF stations from Corpus Christi, KTBC-7 Austin and KPRC-2 Houston are all received on a fairly common occurrence.

I reported mainly because this is the most new stations logged by me at one time in one day. I hope to experience more days like this so I can report again though I see no point in listing re-logs unless they are at least 600 miles away.

(Anything you can contribute is welcome, Bob. I can't DX very often, either. dps)

Pat Dyer, 5315 Silvertip Drive, San Antonio, Texas 78228 (10Apr-10May) (CST exclusively)

Receiver: 1971 model Penncrest 9-inch black-and-white

A rather lengthy report this time, but almost every scrap of it is tropo. Es has been ominously slim in its display so far, and I'm not as optimistic about the summer season as I was in February (which so far has been the best month of the year). Of course, by the time this appears things may have come alive.

The old Alliance T-12 rotor pretty well gave out (though not from all the DX turning, hi) and I'm now using an Archer servo-rotor. As the indicator on the T-12 never did work properly, this is an improvement indeed. 73, WA5IYX.

Glenn Hauser, Box 300 (new), Von Ormy, Texas 78073 (8 Apr - 6 May) (CST always)

No Es at all during this period, perhaps all drained off in February! Tropo wasn't up to par either w/nothing from Florida; north-south paths were good, though, and at one time, Veracruz should have reached Oklahoma City which I was getting simultaneously. Though Las Lajas, Tampico and Matamoros are in roughly the same direction, the duct seldom brings them all. Equipment here remains the same, never having blown down or given me any major trouble despite a 'temporary' installation in August 1971: 1961 RCA New Vista 19" portable (ailing), 1973 RCA 14" color set, Conrac AV12E but no monitor for it yet. Radio Shack 'color eagle' all-channel VHF antenna at about 38 feet above ground; 5 feet higher, PINGO F-7 for UHF, both w/Archer rotor; RG59U coax except for shielded twinlead on UHF along w/Able U-2 amplifier. BTX-111 UHF converter is superior to color set's built-in. Also, on separate pole w/FM antenna, 25 feet above ground, 1C-element ch-9 yagi. CADCO IPA hi and loband available but normally used for FM. Also strip amp for ch 9.

EASTERN TV DX

Dave Pomeroy
KTWU-Channel 11
Signal Hill
Topeka, Kansas 66604

Instead of getting better, TV-DX conditions seem to be getting worse for Eastern TV-DXer's as only two reports have been received for this column along with a few hold-over listings from Ron LeBlanc's May report. Don't forget to make plans for this year's convention at Bob Seybold's in Dunkirk, New York August 2-5. I hope many of you Eastern DXer's can make it.

Ronald J. LeBlanc 2524 Arizona Drive Marrero, Louisiana 70072 (CST)
4-2 1930 WUSF-16 Tampa, FL 3325R0488 4-8 0925 Tr WGR-2 Buffalo, NY 4555R1098
1931 WTOG-44 St. Petersburg 4555R0488 1400 UNID-2 Spanish
2030 WSRF-23 Pensacola, FL 3325R0183 2000 YSR-2 El Salvador 3222R1132
Ron's total is now 283.

Ken R. Simon 528 Pilgrim Road West Palm Beach, Florida 33405 (EST/EDT)

0640 UNID-5 WAGA? 4-30 0725 Tr WLRN-17 Miami, FL 4445R0060
4-26 1630 UNID-8 Cuba (see note) "WSEC-17 switched to WLRN-17 on April 23, 1973"
NOTE: "Have logged and QSL'd channel 8 from Cuba before, but that was a 'Canal 2 Net'"
Is this a new station or net or what? U.S. cartoons shown through 1700 then ID's, PSA's,
and more cartoons in Spanish...most cartoons in English. (Are you sure this was a Cuban
station? dp)...Did get QSL from YNTC-2 in Managua for July '72 reception. Letter said
Televiscentro and TV de Nicaragua jointly sharing all channels (ie 2-12-7-9 for YNTC and 6
and 8 for TV de Nicaragua)... Have applied for Florida auto license tag "TV-DX," second
choice is "TV-DX-73." Will let you know if OK'd and send photo of it on my (soon to be
a classic '71) Gremlin.

David J. Egan 12a Andrew Valleyfield, Quebec (EST)
"Since I missed reporting last month I will cover the period of February 21 through May 1
in DX. I was quite active during this period, and logged 10 new stations on UHF tropo.
Total now 164, with 149 confirmed."

New "DX" Stamps

The U. S. Postal Service has announced the design of four postage stamps that point to Progress in Electronics. The stamps are to be issued in New York City, July 10.

The four stamps, in as many denominations, span development of electronics from Marconi's turn of the century spark coil to the transistor.

An 8-cent stamp for first class mail commemorates the transistors and a printed circuit board... A 6-cent stamp, intended for post cards, shows Guglielmo Marconi's spark coil and spark gap... The 11-cent airmail stamp shows Lee De Forest's refinements to Marconi-- the Audion and the Audion tube... In a 15-cent stamp for international surface mail, three nostalgic electronic elements-- an early microphone, a goosenecked speaker and a vacuum tube, are combined with a TV camera tube,

Each stamp will contain one plate number and will be issued in horizontal format, commemorative size, in panes of 50.

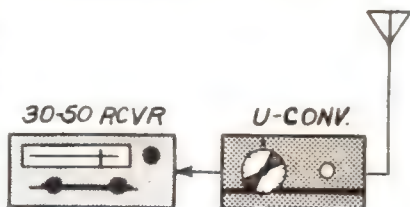

Collectors desiring first day cancellations may make requests to "Electronics Stamps, Postmaster, New York, NY 10001", enclosing the proper remittance and with request postmarked no later than July 10. Price for the set of four stamps is 40¢. A specific stamp or stamps may be ordered.

U. S. Postal Service, via Ken Simon

DX THE UHF PUBLIC SERVICE BAND WITHOUT BUYING A NEW RECEIVER!

VHF utility DXers that would like to start DXing the UHF Public Service Bands, can do so with little or no added expense. A new receiver is not needed!

If you now own a 30-50 Mhz receiver, simply connect a UHF TV converter output to the antenna terminals of the receiver. [Thus far, you are putting your receiver in the place of a TV set.] Now tune the receiver to around 48 Mhz and tune the converter to about channel 19. The UHF converter should now be tuned very close to the UHF PSB [assuming the converter output to be channel 5 or 6].

As you tune the PSB receiver down, you are effectively lowering the tuning range of the UHF converter. To tune the band, use the UHF converter and leave the PSB receiver on one setting. The receiver setting can be used as fine tuning as well.

If a UHF converter is not available, you might consider using a UHF tuner. Replacement types for TV sets are available in the 4 dollar range from many surplus stores. They can usually be powered on a battery and easily mounted in a mini-box or rack panel. The only DXing procedure change that is required, is to tune the PSB receiver lower. How much lower will have to be determined through experimentation.

Using an outdoor UHF TV antenna, local stations should come through quite clearly. You may even hear local ham radio operators talking on 432 Mhz. As with any receiving installation, a better antenna will provide better results.

WTFDA Convention '73

August 2-5, Dunkirk, NY

WTFDA invites all members to attend the 1973 WTFDA convention.

This year's convention is hosted by veteran host and DXer, Bob Seybold. Bob has been busy making all the arrangements and promises a great time for all in attendance.

The program will include guest speakers, slides, films, tapes, demonstrations and just general gab sessions. As usual, we'll have a door prize drawing and plenty of technical literature.

The convention itself is to be held directly across from the Vineyard Motel. Rooms are available at a special reduced rate from the Vineyard, but reservations must be sent to Bob Seybold as-soon-as-possible. The rates are as follows:

1 person - 1 bed \$10

2 persons- 1 bed \$14

2 persons- 2 beds \$16

Each additional person per room is \$2.

For example, 2 persons, 2 beds is \$20.

The convention registration fee, which covers the Saturday evening meal, refreshments and other convention expenses, is \$10.

One of the special convention features, will be visits to Bob's hilltop DXing location. The results of this height on DXing, must be seen to be believed.

The first trip to the hills is planned for Thursday evening, with one or two more throughout the weekend.

The main convention program will get into full swing Friday evening, and continue through Sunday. The final event Sunday morning, will be our traditional open discussion of WTFDA and how we can improve.

We'll have more program details next month.

Bob Seybold has emphasized that it will be necessary to make advance reservations. This should be done at your first opportunity, since the area is also hosting a fireman's convention on the same weekend.

Use the registration form or write Bob today.

Convention Host:
Bob Seybold
Bennett Road, RD #2
Dunkirk, New York 14048

SERVING THE
VHF-UHF DX
ENTHUSIAST

P. O. BOX 143
MERRIFIELD, ILLINOIS 60015

The VHF-UHF DIGEST is the monthly publication of the Worldwide TV-FM DX Association. WFDXA is a nonprofit organization and a member club in the Association of North American Radio Clubs.

Dues: US and Canada: \$7 third class mail and \$9 first class, per year. Overseas: \$8 per year.

VUD Back Issues Available: (1970) July (1971) August

(1973) May, June

All back issues are 75¢ each, by special 4th class or 1st class.

|||||SUPPLIES|||||

FM Atlas and Station Directory: \$2.50 3rd class, \$3 1st class. By Dr. Bruce P. Elving, WFDXA FCC FM column editor. Very detailed, and probably the most accurate FM listing available. Offset printed.

Stationery: Features official WFDXA emblem printed in blue. Ideal for all your correspondence. 45 sheets: \$1.

Log Sheets: Perfect for keeping your running log neat and organized. Punched for a three ring binder. Pad of 100: \$2.

VUD Boxes: A great way to keep your copies of the VHF-UHF DIGEST neat and protected. Very attractive and a bargain at \$1.25!

Station Report Forms: For requesting QSL's. 45 sheets: \$1.

DX Column Report Forms: For reporting to columns. Free w/ 3MS2

All persons contributing their efforts for the Worldwide TV-FM DX Association, including editors, writers, artists, reporters and board members do so without any monetary compensation. Dues and all other revenue cover printing, postage and other expenses.

The WFDXA is governed by a five man board of directors. Board members are Dave Janowiak, Bruce Elving, Ferdinand Dombrowski, Gary Olson and Morrie Goldman.
